

Press Release

Unlimited custom backing tracks now!

September 25, 2009

Thanks to the success of having 20,000 available songs, the **Karaoke-Version** website now offers the "Unlimited custom backing track" feature.

All of our custom backing tracks are now available for unlimited mixing. Moreover, this feature is also retroactive, all previously downloaded files can be remixed.

This feature is one additional asset to our custom backing tracks. The custom backing track features now include the universal MP3 format, the professional quality, the possibility to test the program through free songs ready to be mixed, unlimited mixing and the catalog of over 2,000 available songs.
