Press Release

Okarima Service Launch

01/10/2012

Among challenges that Recisio is facing in 2012 is the monetization of signed catalogs with its publishing partners.

Illegal Karaoke uses on the web are countless and do not generate any revenues for rights holders. As a result, we have decided to launch the service Okarima aimed at monitoring and removing on behalf of right holders any 'toxic' Karaoke content from social video platforms.

Partners like Sony ATV, Warner Chappell, Peer Music and Emha have already joined the service. More to come !
